Preface

All the living entities who are in this material world are struggling very hard for existence. For them, the God after creation of the material world gave the Vedic wisdom advising us how to live and get rid of the material entanglement. But due to his desire to lord it over material nature, the living entity is put into undesirable circumstances. Vedic wisdom tries to convince the living entity that their activities in the material field are not conducive to real happiness. He should give it up and turn his faith towards God, and then he is sure to be happy.

There are many schools and colleges, many research Institutions and philosophers who study modern life or some other subjects pertaining to matter but there is no institution, where education on spirit is imparted. Therefore it is very necessary that one should make research to understand the self to enable him to be free from the miseries and become happy. Here is a humble beginning through which one can assess his weaknesses and strengths with the knowledge of Vedic Palmistry through which the living entity can find out themselves and remove their shortcomings.

Through this science one is able to find out the symptoms of one's diseases causing unhappiness. These

symptoms are available by understanding the palm lines on their hands. The symptoms are also knowable through mounts on the hands which are representing the mighty planets. Through the mode of material nature (Satoguna, Rajoguna, Tamoguna), one is able to know, in which mode he is placed and act accordingly and try to come out of grief. Through the guidelines given in the Vastu Shastra one is able to understand the influence of five elements on the living beings.

To eradicate the causes of miseries on the basis of symptoms the medicine is also prescribed in this small book. Such medicines are: Yagya performance, Transcendental Meditation, Pranayama, Yoga, Simran, Knowledge about real concept of religion etc; to get rid of demonic nature and achieving Divine nature, understanding consciousness, super-consciousness, and divine consciousness.

Efforts have been made to illustrate and explain symptoms, disease and the medicine by which one is likely to increase his awareness, raise one's level of consciousness and attain real happiness which human beings deserve.

Introduction of the Author

I was born in a poor family of Brahmins. The family used to live only on the mercy of God and my father could only earn bread for the family by performing religious activities, and my spiritual master; my father opened my eyes with the torch of knowledge. I offer my respectful obeisance unto him. I also offer my obeisance unto the lotus feet of Mother Sarswati ji who has given me vision and faith to enable me to write my personal understanding based on the teaching of Lord Krishna, as mentioned in the Bhagwat Gita.

My spiritual father used to believe in simple living and high thinking and lived a saintly life, free from lust, greed and anger. I never found him wanting. He was satisfied with whatever God gave him in life. He never had any complaints. He used to speak little and eat little. He always kept himself busy in religious rituals. I believe that the way he used to live his life, he attained all such qualities which a godly man could have. Most of his time passed in meditation and performing religious rituals, yoga and yagya. Whatever little time he could spare, he used to make predictions about queries of the people through his spiritual power.

At the age of about eight years, I was attracted towards the activities of my father. The art of palm

SAMPLE

reading by my father attracted me the most. My preliminary little knowledge of reading palm lines started by first of all looking into the palm lines of my father. At this little age, I was very much upset to find that the life line of my father was very short and incomplete at that time. Perhaps this was a turning point in my life which compelled me to have an urge to take deep interest in this art of Vedic palmistry. It kept me always anxious to find the truth. Two years passed and at the age of ten years, I again looked in to the palm lines of my father. To my surprise I found that the life line of my father developed and became complete because of his holy activities including his meditation and spiritual power. This brought a sea change in my life. I started reading books concerning spiritualism and Vedic palmistry of various scholars. This continued for eight long years.

At the age of eighteen, I started reading the palm lines of various people without having any desire for financial gains. More and more I engrossed myself in such activities, I became curious about my own fate. To my dismay, I found that I was not having any fate line on my palm and there were no mounts fully developed. I had no name or fame in this field. While worshiping Mother Saraswati I happened to be blessed by the Mother and it came to my mind to do meditation and perform yagyas in a sacred lonely place. After sometimes, I

SAMPLE

observed that my fate line appeared on my right palm and mounts also started developing. With passage of time to my surprise, very clean, straight and powerful fate line developed on my right palm. This made me confident to understand that one can change everything in one's life with meditation, yoga, yagya, knowledge of Vastu Shastra and of course with good deeds. The religious activities gave me the strength of intuition power. These unique blessings of Mother divine made me capable of understanding to predict the future and gave me name and fame. I got Talent search award in 2004 and Excellency award in 2006 which was published in various news papers.

With more determination side by side, I continued to study and to meet several renowned scholars in palmistry, Astrology, Vastu science and shared and discussed my knowledge with them. Finding that these scholars were much impressed with my observations and findings, I was encouraged to expand my involvement in this field. I also met different traits of people like Doctors, Lawyers, Businessmen, spiritual Gurus and others. By reading the palm lines of such people gave me much needed improved knowledge. For the last five years, I have made my mission to assist the needy persons by making them successful through my holy services of performing yagyas, giving predictions for them for their betterment and empowerment to enable them to lead a

SAMPLE

life full of happiness.

There are six continents in this world where people are living. Before writing this book, the people of several countries of Asia, Africa, South America, North America, Europe and Australia have come into my contacts and I have the privilege to examine the hand prints of those people

Here I am trying to explain my impressions & conceptions about Vedic Palmistry for the development of consciousness so that the readers may be able to know about Dharma as it is, Yagya, Meditation, Yoga, Satoguna, Rajoguna, Tamoguna, Divine Nature and different stages of consciousness as explained in Shrimad Bhagwat Gita so that with the blessings of Mother Sarswati ji, they are able to get peace of mind and success in their life.

Let Mother Sarswati ji also bless me to make this humble contribution of making innocent & distressed people out of their miseries.

It is not out of place to mention to tell the readers that I have been praised by several people of more than fourty countries for whom I assisted in resolving their physical, mental and financial problems through making predictions and performing Yagyas in accordance with Vedic and spiritual knowledge.

VEDIC PALMISTRY

In Hindu Mythology the Vedas are considered to be the most sacred scriptures. The Vedas along with the Gita contain a lot of knowledge. These scriptures are approximately 5000 years old. There are four Vedas with six appendices, which explain as to how one can read and use them. One among the appendices discusses about JYOTISHA, which literally means "(Light from God)".

Jyotisha concerns with Astronomy & Astrology. We get tips in abundance to know as to how we can read the body. We can also read the different signs and understand the language of time using the birth chart. The study of parts of the body including hands is a branch of Palmistry and is called Hast Samudrika Shastra. It is an ocean full of knowledge, concerning signs & symbols of the hands. Thus we may say that Astrology and Palmistry are co-related.
