Dedication

(Late) Shree Bajarang Fateh Bahadur Singh
(Warrant Officer_Indian Air Force) 28 April 1943 to 11 June 2016.

It was my good fortunate the God sent you in my life as a father. Such a pen has not been made yet as I can write something about you. I am not able to explain your dedication in the journey to fulfil a dream of a daughter for getting the highest degree of education world. Today these moments of my life would have been very beautiful if you were with me at this time. I am the luckiest daughter whose father is like

you, who did not differentiate between son and daughter. Going against social ideologies, the way you stay with me every moment will be remain in my heart and soul throughout my life. It Will be my endeavour throughout my life that every step of my life be so that you can feel proud where ever you are and keep Inspiring and blessing me. You never let me feel the struggle and thorns of life. Perhaps that is why the father is called the Banayan Shade, which never let his children feel the heatness sun in life. May God keep us and our relationship in every birth like this.

Preface and Acknowledgement

I appreciate the interest of the readers for their curiosity to know about "Humanization in Technical Era and Technology Upgradation in India". This book is intended to spread awareness about how human values are effected by technology positively and negatively both in present era. To facilitate the development of technology upgradation we should not underestimate the values.

The book emphasizes that we all should be aware about human values first rather then technology. My aim is for the concepts in this book to have privilege for people's value everywhere, all over the world's culture, religions, society, human values etc. I hope that any insight you will be profitable from this approach will inspire and sustain you to live with ethics and values.

Loss of humanization in technical era caused by human activity is of considerable contemporary concern. The focus of this book is on the relevance of humanization and technology both in present era. Technology and humanization both are combined in this book because both are necessary for the development, only we need to balance it properly.

The current book drawns on extends and updates materials that has previously been published in renowned national and international journals. I am heartly thankful to my parents father late shri Bajarang Singh and mother smt. Jeewanasha singh for their extreme contribution in life. I can not forget ever the contribution of my husband Mr. Satyaveer Singh for developing me as a writer as he always boost me towards it positively. Much gratitude to our little

daughter Prajawala Kanwar, whose attractive and sweet smile, playful and glowing eyes and tiny steps make my way towards inspiration. With the birth of Prajawala Kanwar this new desire was born in the heart of a mother, as I should give something to this new generation as a gift which is immense and priceless. Which I feel nothing is better then to transform knowledge as a form of book. I am also thankful to my guide Dr. Alok Kumar Singh and his wife Smt Poonam Singh, my maternal uncle shri Sridhar singh Chauhan, my sisters smt Anju and smt Rekha singh and many people those are been supportive in life but they all are always in my heart for their infinite support.

Before summing up my thanks note I would like to mention my all students here whom I taught ever. They are my first appreciator who always make me more confident and dedicated towards study by their appreciation in classroom. My students who always liked to take my notes instead of any book of college library, they always kept saying that "ma'ám your lectures with topic been already remembered us when you end it in class: hence my all students are inspiration for me.
